**Illuminator**  
Car Wash Building  
by Ultimate Products, Inc.

Finally, a car wash building that puts the control in your hands. Giving you, the car wash owner, the design flexibility to meet needs without sacrifice. Introducing Ultimate Products' *Illuminator* line of car wash buildings...*The Clear Choice*.

Engineered to suit a wide array of individual requirements, each *Illuminator* car wash building is constructed of the highest quality aluminum, glass, and polycarbonate available. This unique combination of materials guarantees the *Illuminator* car wash building increased durability and around-the-clock security, ensuring a continual source of profits for years to come.

Heated frames that prevent ice build-up, allowing doors and other car wash equipment to work freely in cold conditions, is just one of the several Ultimate Products *Illuminator* car wash building exclusives. Thermally broken construction, an interchangeable exterior cap design, and the only car wash building to offer a 1" insulated glass option, round out why the *Illuminator* car wash building is in a league of its own.

Loaded with options, including equipment rooms, lights, and personnel doors, the *Illuminator* car wash building is designed for use with ALL car wash equipment. Conveyors, automatic rollovers, touch-free, and self serves are all compatible! Even more impressive is the fact that no modifications are needed when using Ultimate's premiere line of polycarbonate, air-powered Overhead and Glider doors.

Combined with Ultimate's affordable stainless-steel radiant tube heaters, the Ultra Hotshot heater/dryer, and our air-powered polycarbonate overhead and glider doors for the ULTIMATE car wash package, it's no wonder why the *Illuminator* car wash building by Ultimate Products, Inc. is **THE CLEAR CHOICE!**

**\*Contractor Responsibility**  
Contractor provides concrete pad according to dimensions provided by Ultimate Products. Concrete pad depth to be determined by local engineer.

**\*\*Engineer Drawing**
